

Effective Pretreatment Routes of Polyethylene Terephthalate Fabric for Digital Inkjet Printing of Enzyme

Tuser Biswas, Junchun Yu, and Vincent Nierstrasz*

Adv. Mater. Interfaces **2021**, *8*, 2001882

DOI: 10.1002/admi.202001882

In the originally published article, two figure numbers were referenced incorrectly on page 5 of 10. **Figure 1** should be read as **Figure 4** in section 2.3. Enzyme Immobilization. The text referencing the figures is corrected to read:

“Traces of nitrogen (N%) were present on all measured samples (Figure 4),” – Not Figure 1.

“After printing, all the samples showed significantly higher N% than only pretreated ones (Figure 4).” – Not Figure 1.
